

## Pedestrianisation of Market Place – October 2020

Undated letter received concerning Market Place as a clean air zone, survey undertaken of Market Place, and free parking concession

Undated letter  
October

Reply sent 3.11.20

As Market Place is the main central road through the Town it is unlikely it would become a clean air zone unless, of course, it was completely pedestrianised. However, there are currently no plans to do this.

The survey of the Market Place was undertaken by North Norfolk District Council and Norfolk County Council and you should contact them for this information. We do not hold details here.

You mentioned setting up a Resident's Group, but you were not specific as to what the group would be concerned with. Maybe you could provide some information.

North Norfolk District Council are reviewing the Market Place situation on a regular basis so there will be no voting involved for residents. However, if you feel strongly about this in any way you could always write to the District Council about your concerns.

With the continuing COVID-19 restrictions that are being imposed and government guidance regularly changing, no one can predict how North Norfolk District Council will deal with the free parking concession in the future.

At present following the Prime Minister's announcement that there is to be another lockdown the office will be closed until further notice. If you wish to discuss this matter you can telephone on 01692 404114 and leave a message and your telephone number, and I will call you back.

Letter received from requester thanking for a complete and thorough reply.
